The City of Monett (City) complies with generally accepted accounting principles (GAAP). The Governmental Accounting Standards Board (GASB) is the accepted standard setting body for established governmental accounting and financial reporting principles. The City's reporting entity applies all relevant Governmental Accounting Standards Board (GASB) pronouncements. Proprietary funds and similar component units apply Financial Accounting Standards Board (FASB) pronouncements and Accounting Principles Board (APB) opinions issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements, in which case GASB prevails.

THE FINANCIAL REPORTING ENTITY

The City, for financial purposes, includes all of the funds and account groups relevant to the operations of the City of Monett, Missouri. ACCOUNTING POLICIES

Basis of Presentation - Fund Accounting

The accounts of the City are organized into funds and accounts groups, each of which is considered to be a separate accounting entity. The major fund categories and account groups are:

Governmental Fund Types

Governmental funds use the current financial resources measurement focus. Only current assets and current liabilities are generally included on their balance sheet. Their operating statements present sources and uses of available resources during a given period.

Proprietary Fund Types

Proprietary funds use the economic resources measurement focus. The accounting objectives are determination of net income financial position and cash flows. All assets and liabilities associated with a proprietary fund's activities are included on its balance sheet. Proprietary fund equity is segregated into contributed capital and retained earnings.

NOTE A - SUMMARY OF ACCOUNTING POLICIES (continued)

BASIS OF ACCOUNTING AND MEASUREMENT FOCUS

The basis of accounting determines when transactions and economic events are reflected in financial statements, and measurement focus identifies which transactions and events should be recorded.

Modified Accrual Basis of Accounting

The City uses the modified accrual basis of accounting for governmental funds. The modified accrual basis of accounting recognizes revenues when both “measurable and available”. Measurable means the amount can be determined. Available means collectable within the current period or soon thereafter to pay current liabilities. The City considers revenues to be available if they are expected to be collected within 30 days of the end of year end. Also, under the modified accrual basis of accounting, expenditures are recorded when the related fund liability is incurred, except for general obligation bond principal and interest which are reported as expenditures in the year due. Transfer between funds that are not expected to be repaid are accounted for as other financing sources (uses). These other financing sources (uses) are recognized at the time the underlying events occur.

Accrual Basis of Accounting

The accrual basis of accounting is used in proprietary fund types. Revenues are recognized when they are earned, and expenses are recognized when they are incurred. Transfers between funds that are not expected to be repaid are accounted for as other financing sources (uses). These other financing sources (uses) are recognized at the time the underlying events occur.

Budgets and Budgetary Accounting

All departments of the City of Monett, Missouri are required to submit requests for appropriations to the government’s director of finance in January each year. The director of finance uses these requests as the starting point for developing a proposed budget. The director of finance then presents a proposed budget to the council for review prior to March 10th. The council is required to hold public hearings on the proposed budget and to adopt a final budget by no later than March 31, the close of the City of Monett, Missouri’s fiscal year.

The budget is prepared on the cash basis of accounting, which is another comprehensive basis of accounting. The cash basis of accounting recognizes revenues when collected and expenditures which are paid. Unused appropriations for all of the above annually budgeted funds lapse at the end of the year.

The budget for the fiscal year ended March 31, 2005, was amended March 20, 2005. Revisions were made to the budget after initial adoption by the City Council.

REVENUE BONDS

Specifically, the bond indentures for the 1992A sewer project, and the Tax Increment Revenue Bonds require the use of operations and maintenance, principal and interest, reserve account, and depreciation and replacement account. The reporting entity is in compliance with all significant requirements of the various bond covenants.

The sewer project bonds are recorded in the proprietary fund since the repayment is to be from the operations for which the debt was issued. The Tax Increment Revenue Bonds are reported in the long-term debt account group since the Tax Increment finance district is a major revenue fund.

Advance Refunding of Revenue Bonds, Series of 1990:

During the year 1992, the city of Monett issued sewer system revenue refunding and improvement bonds series 1992A. The net proceeds were used to provide improvements for the sewer system and to purchase U.S. Government securities. Those securities were deposited in an irrevocable trust with an escrow agent to provide for debt service payments on the series 1990 bonds. As a result, the series 1990 bonds are considered to be defeased and the liability for those bonds has been removed from the sewer fund, a component of the enterprise fund. The annual requirements to amortize the 1990 bonds in defeasance, including interest payments are as follows:

For 2004, the political subdivision's annual pension cost of \$476,080 was equal to the required and actual contributions. The required contribution was determined as part of the February 28, 2002, and/or February 28, 2003 annual actuarial valuation using the entry age actuarial cost method. The actuarial assumptions included (a) a rate of return on the investment of present and future assets of 7.5% per year, compounded annually, (b) projected salary increases of 4.0% per year, compounded annually, attributable to inflation, (c) additional projected salary increases ranging from 0.0% to 4.2% per year, depending on age, attributable to seniority/merit, and (d) pre- and post-retirement mortality based on the 1983 Group Annuity Mortality table and (e) post retirement mortality based on the 1971 Group Annuity Mortality table projected to 2000 set back 1 year for men and 7 years for women.

The actuarial value of assets was determined using techniques that smooth the effects of short-term volatility in the market value of investments over a five-year period. The unfounded actuarial accrued liability is being amortized as a level of percentage of projected payroll on a closed basis. The amortization period at February 29, 2004 was 15 years.
