

Construction of upgrades and improvements to the City of Monett Wastewater Treatment Plant are ongoing, with financing provided by a local bond issue and the Missouri Clean Water State Revolving Fund. The CWSRF program is administered by the Missouri Department of Natural Resources with joint funding from the US Environmental Protection Agency and the State of Missouri. This project will upgrade the facility's raw sewage pumping and effluent filtration equipment and will provide reliable standby power, thereby insuring the continued delivery of high quality treated waters to Clear Creek. The CWSRF programs operate around the country to provide states and communities the resources necessary to maintain and improve the infrastructure that protects our valuable water resources nationwide.
